<b>Comments</b> (Reference above questions as appropriate.)					
Conducted VA SWPP inspection from MP 206 to 208.8. Since last inspection Precision Pipeline has worked on ECD maintenance, ECD upgrades, and stabilization off the ROW. ROW has been stabilized from 10883+50 to 10930+00. ROW stabilization has been conducted using seed, mulch, and earth guard pellets. Storm event consisted of 0.3 inches of rain fall.					
<b>Note:</b> It is a condition of National Pollutant Discharge Elimination System and Erosion and Sediment permits that a maintenance program be conducted to provide for the operation and maintenance of all BMPs to be inspected on a weekly basis and after each stormwater event. Please list in the space provided comments to note if repairs or replacement are needed or have been made for BMPs as a result of the inspection. Failure to conduct the required inspection may result in permit suspension or the imposition of civil penalties. If supplemental monitoring is required as part of a permit condition this form may be used to meet those monitoring requirements.
