Re: Mountain Valley Pipeline, LLC  
Docket No. CP16-10-000  
Supplemental Materials

Dear Ms. Bose:

On October 23, 2015, Mountain Valley Pipeline, LLC (“Mountain Valley”) filed a certificate application with the Federal Energy Regulatory Commission (“Commission”) for the Mountain Valley Pipeline Project in the above-identified docket.

Mountain Valley submits herein the following supplemental materials:

| <b><u>Attachment</u></b> | <b><u>Description of Materials</u></b>  | <b><u>Filing Type</u></b> |
|--------------------------|---|---------------------------|
| A                        | Addendum: Phase I Reconnaissance Architectural Survey, Pittsylvania and Franklin Counties, Virginia   | Public                    |
| B                        | Phase II Archaeological Investigations, Sites 46DO094, 46HS100, 46HS101, 46HS104, 46HS109, 46HS125, and 46LE077, Doddridge, Harrison, and Lewis Counties, West Virginia | Privileged                |
| C                        | Hydrologic Analysis of Sedimentation, Jefferson National Forest   | Privileged                |
| D                        | Supplemental Mist Net Surveys within Jefferson National Forest (letters submitted to USFS, USFWS, and VDGIF)  | Privileged                |
| E                        | Field Surveys for Bald and Golden Eagles, Craig, Giles, Montgomery, Roanoke, Franklin, and Pittsylvania Counties, Virginia  | Privileged                |

Attachments B-E include privileged information. The attachments are labeled “Contains Privileged Information – Do Not Release” or similar. Mountain Valley requests that, pursuant to 18 C.F.R. § 388.112, the Commission treat the privileged information as non-public. The person to be contacted regarding the request to treat these materials as non-public is Paul Diehl, (412) 395-5540 or pdiehl@eqt.com.

Ms. Kimberly D. Bose

**Subject: Mountain Valley Pipeline Project  
Addendum: Phase I Reconnaissance, Architectural Survey for  
Mountain Valley Pipeline, Pittsylvania and Franklin Counties, and  
V-CRIS Site Forms and Photographs  
VDHR File #2014 1194  
Request for Review under Section 106 of the National Historic Preservation Act**

Dear Mr. Kirchen,

On behalf of Mountain Valley Pipeline, LLC, a joint venture between affiliates of EQT Midstream Partners, LP and affiliates of NextEra Energy, Inc., Con Edison Midstream Gas, LLC, WGL Holdings, Inc., Vega Energy Partners, Ltd., and RGC Midstream LLC, you will find enclosed a CD with digital files, V-CRIS Site Forms and Photographs, and two paper copies of the document entitled:

*Addendum: Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Pittsylvania and Franklin Counties, Virginia*

Please review these reports under Section 106 of the National Historic Preservation Act, as amended. These reports have also been filed with the Federal Energy Regulatory Commission, lead federal agency overseeing the MVP Project.

You may contact me by telephone at (304) 841-2086 or by e-mail at [mneylon@eqt.com](mailto:mneylon@eqt.com) if you have questions. You may also contact Sydne Marshall, by telephone at (973) 630-8104 or by e-mail at [sydne.marshall@tetrattech.com](mailto:sydne.marshall@tetrattech.com).

Thank you for your attention.

Sincerely,

Megan Landfried Neylon  
Senior Environmental Coordinator

Attachment – 2 paper copies of report, 1 CD, and Associated V-CRIS Site Forms and Photographs

New South Associates Project 4613  
Report 2562

June 2016

## ABSTRACT

The proposed Mountain Valley Pipeline (MVP) natural gas pipeline route runs approximately 301 miles from northern West Virginia to southern Virginia. As an interstate pipeline, the Federal Energy Regulatory Commission (FERC) will regulate the project. FERC has assigned the project Docket # CP-16-10-000. The project has been assigned Virginia Department of Historic Resources (VDHR) file # 2014 1194.

New South Associates, Inc. (New South) conducted a Phase I reconnaissance level architectural survey along the 105-mile pipeline route that falls within the state of Virginia, which crosses Pittsylvania, Franklin, Roanoke, Montgomery, Craig, and Giles counties. The Area of Potential Effects (APE) for historic architecture extends into these counties, as well as a small area within northern Floyd County. The APE for architectural resources encompasses approximately 61,000 acres and includes areas of direct and indirect effects as approved by the VDHR on April 21, 2015. The goals of the architectural survey were to record resources over 50 years of age within the APE and to identify resources that appear potentially eligible for the National Register of Historic Places (NRHP) that merit Phase II intensive survey. Architectural survey was limited to properties visible from public rights-of-way and the archaeological APE for direct effects. Tetra Tech, New South, and SEARCH archaeological teams also provided some information about historic architectural resources including structures and cemeteries that were observed by them when traversing the direct effects APE.

New South has compiled the results of the Phase I architectural reconnaissance survey in reports organized by county. This report is an addendum to the reports *Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Pittsylvania County (October 2015)* and *Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Franklin County (September 2015)*. This report describes results of a second phase of fieldwork within survey areas where the pipeline route had been modified from the proposed route to the final route and in areas where the APE had been expanded to encompass construction access roads and temporary work spaces.

The APE for historic architectural resources in Pittsylvania and Franklin counties is 56.57 miles in length and runs between pipeline milepost markers 300.97 in the east and mile marker 244.4 in the west. The historic architecture survey, both the initial survey and the second phase that took into account the final route, was conducted between May and December 2015. During the second phase of fieldwork on the final route, 34 additional architectural resources were recorded in the online database Virginia Cultural Resources Information System (V-CRIS). Six of these resources were previously recorded and had existing VDHR site identification numbers. Twenty-eight were newly recorded resources, and each was assigned a site identification number by VDHR. In addition to the three resources that were recommended for additional study in the

first reconnaissance survey reports for Pittsylvania and Franklin County, this *Addendum* report recommends an additional four resources (033-0389, 033-5398, 071-5483, and 033-5400) for Phase II study to determine NRHP eligibility.

## I. INTRODUCTION

The proposed Mountain Valley Pipeline (MVP) natural gas pipeline route runs approximately 301 miles from northern West Virginia to southern Virginia. As an interstate pipeline, the Federal Energy Regulatory Commission (FERC) will regulate the project. FERC has assigned the Mountain Valley Pipeline (Project) Docket #CP-16-10-000. The Project is being reviewed under the Virginia Department of Historic Resources (VDHR) file #2014-1194.

Between May and September 2015, New South Associates, Inc. (New South) conducted a Phase I reconnaissance level architectural survey for the proposed Virginia segment of the Mountain Valley Pipeline under contract to Tetra Tech, Inc. on behalf of Mountain Valley Pipeline, LLC. The Virginia Area of Potential Effects (APE) consists of a 105-mile corridor through Pittsylvania, Franklin, Floyd, Roanoke, Montgomery, Craig, and Giles counties (Figure 1). The survey of historic architecture resulted in five Phase I Reconnaissance Architectural Survey reports. Detailed descriptions of the undertaking, the APE and its development for this project, the research and survey approaches undertaken, and the setting and historic contexts for each county can be found in the reports listed in Table 1.

**Table 1. Status of MVP Phase I Architectural Survey Reports Complete as of March 2016**

| Title   | Report Date        | VDHR Review Status                                   |
|---|--------------------|--|
| <i>Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Pittsylvania County</i>        | August 12, 2015    | VDHR Concurred with Findings, 10/22/2015             |
| <i>Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Franklin County</i>            | September 11, 2015 | VDHR Concurred with Findings, 1/6/2016               |

| <i>Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Montgomery County</i>          | March 15, 2016     | VDHR Returned Draft with Minor Comments on 5/16/2016 |
| <i>Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Craig and Giles Counties</i>   | March 15, 2016     | VDHR Returned Draft with Minor Comments on 5/16/2016 |

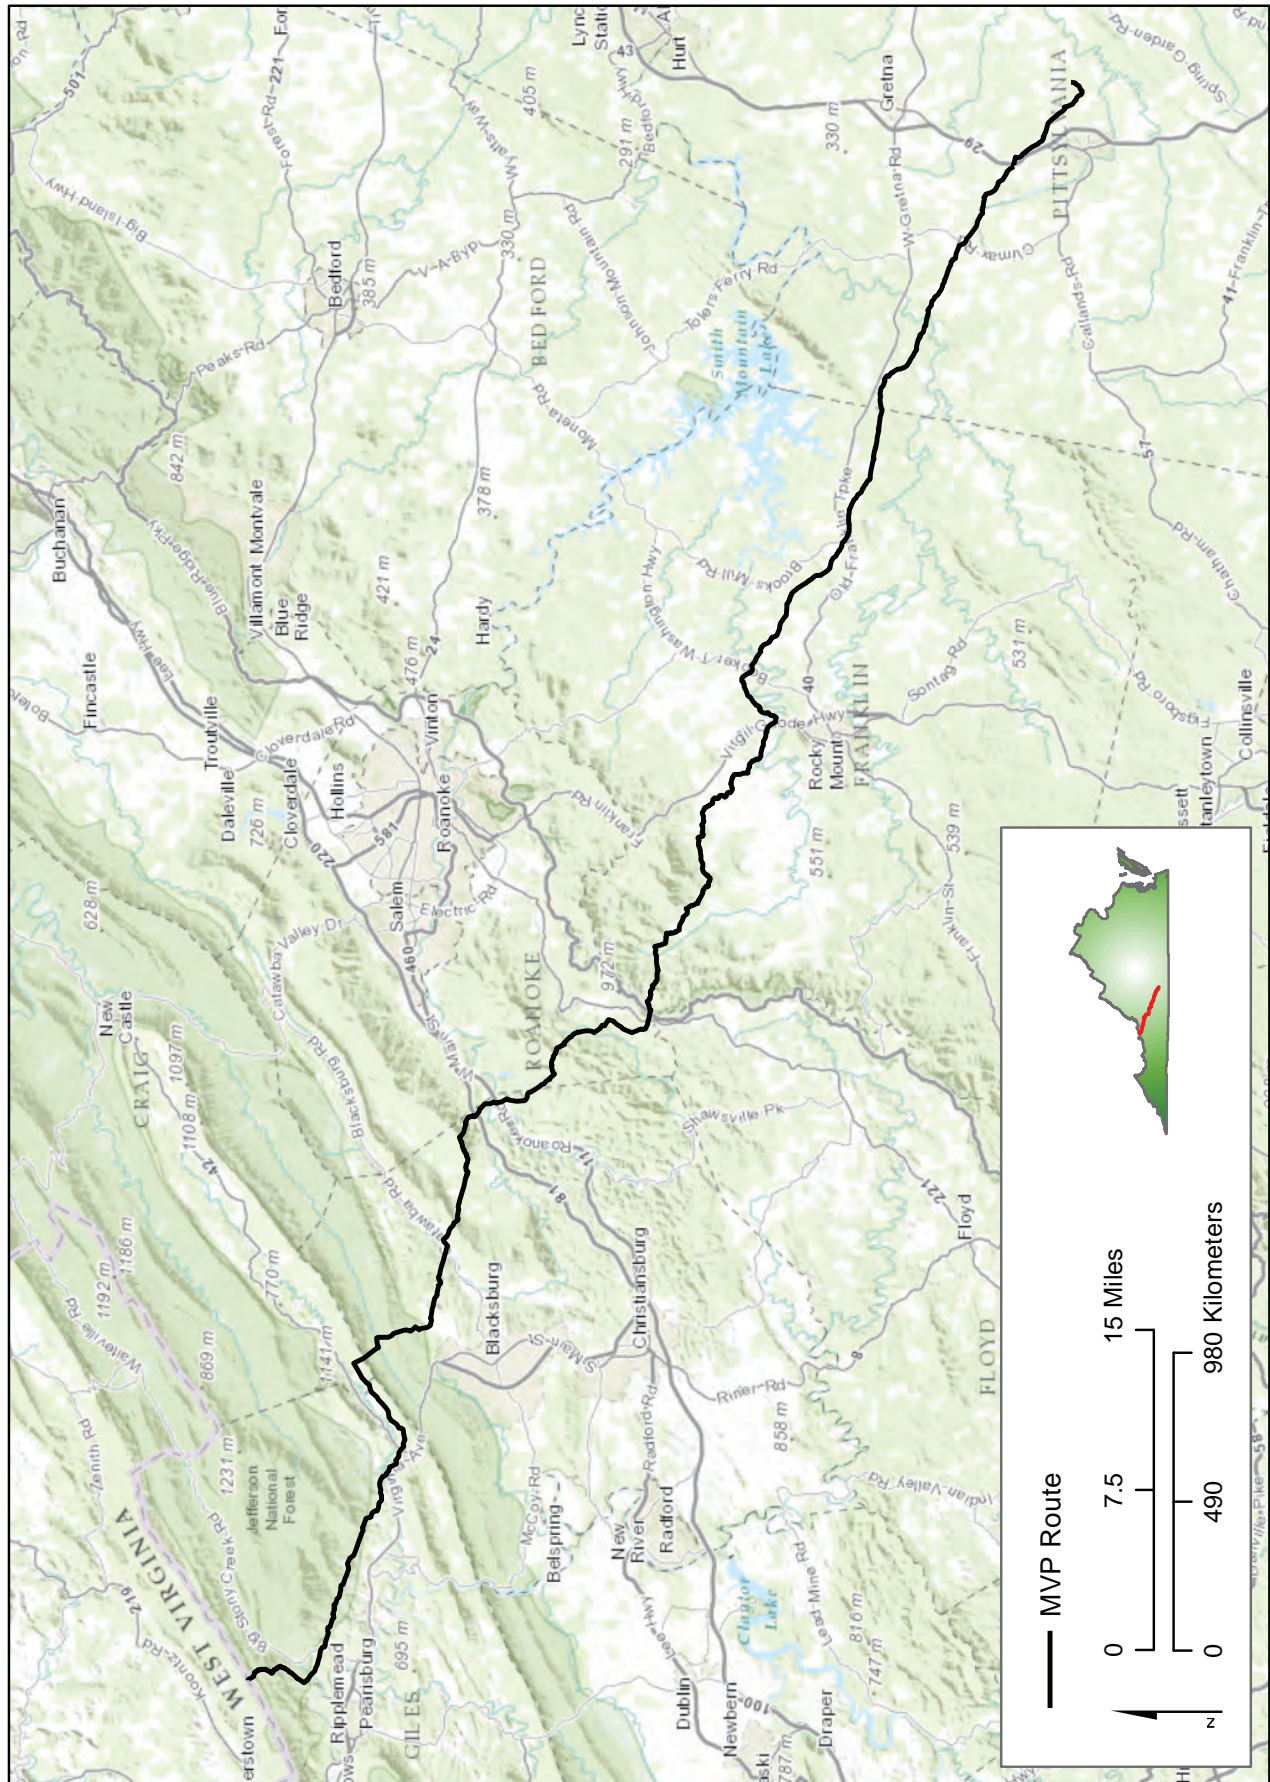

Figure 1. MVP Route Through Virginia

In October 2015, Mountain Valley Pipeline, LLC filed an application for a Certificate of Convenience and Necessity with FERC containing a finalized route for the pipeline. As a result of changes to the route, a modified APE for direct and indirect effects was devised following the methods approved by VDHR April 21, 2015. Between October and December of 2015, New South conducted additional fieldwork to survey areas where the pipeline route had been modified from the proposed route to the final route and in areas where the APE had been expanded to encompass construction access roads and Temporary Work Stations. The results of the October-December 2015 fieldwork were incorporated into the historic architecture resource reports for Roanoke and Floyd counties, Montgomery County, and Craig and Giles counties prior to their submittal to VDHR for review. However, the Pittsylvania and Franklin County historic architecture resource reports had already been submitted to VDHR prior to completion of the October-December 2015 fieldwork. This report, *Addendum Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline (Pittsylvania and Franklin Counties)*, includes resources identified during the October-December 2015 survey of the final pipeline route in these counties (Figure 2).

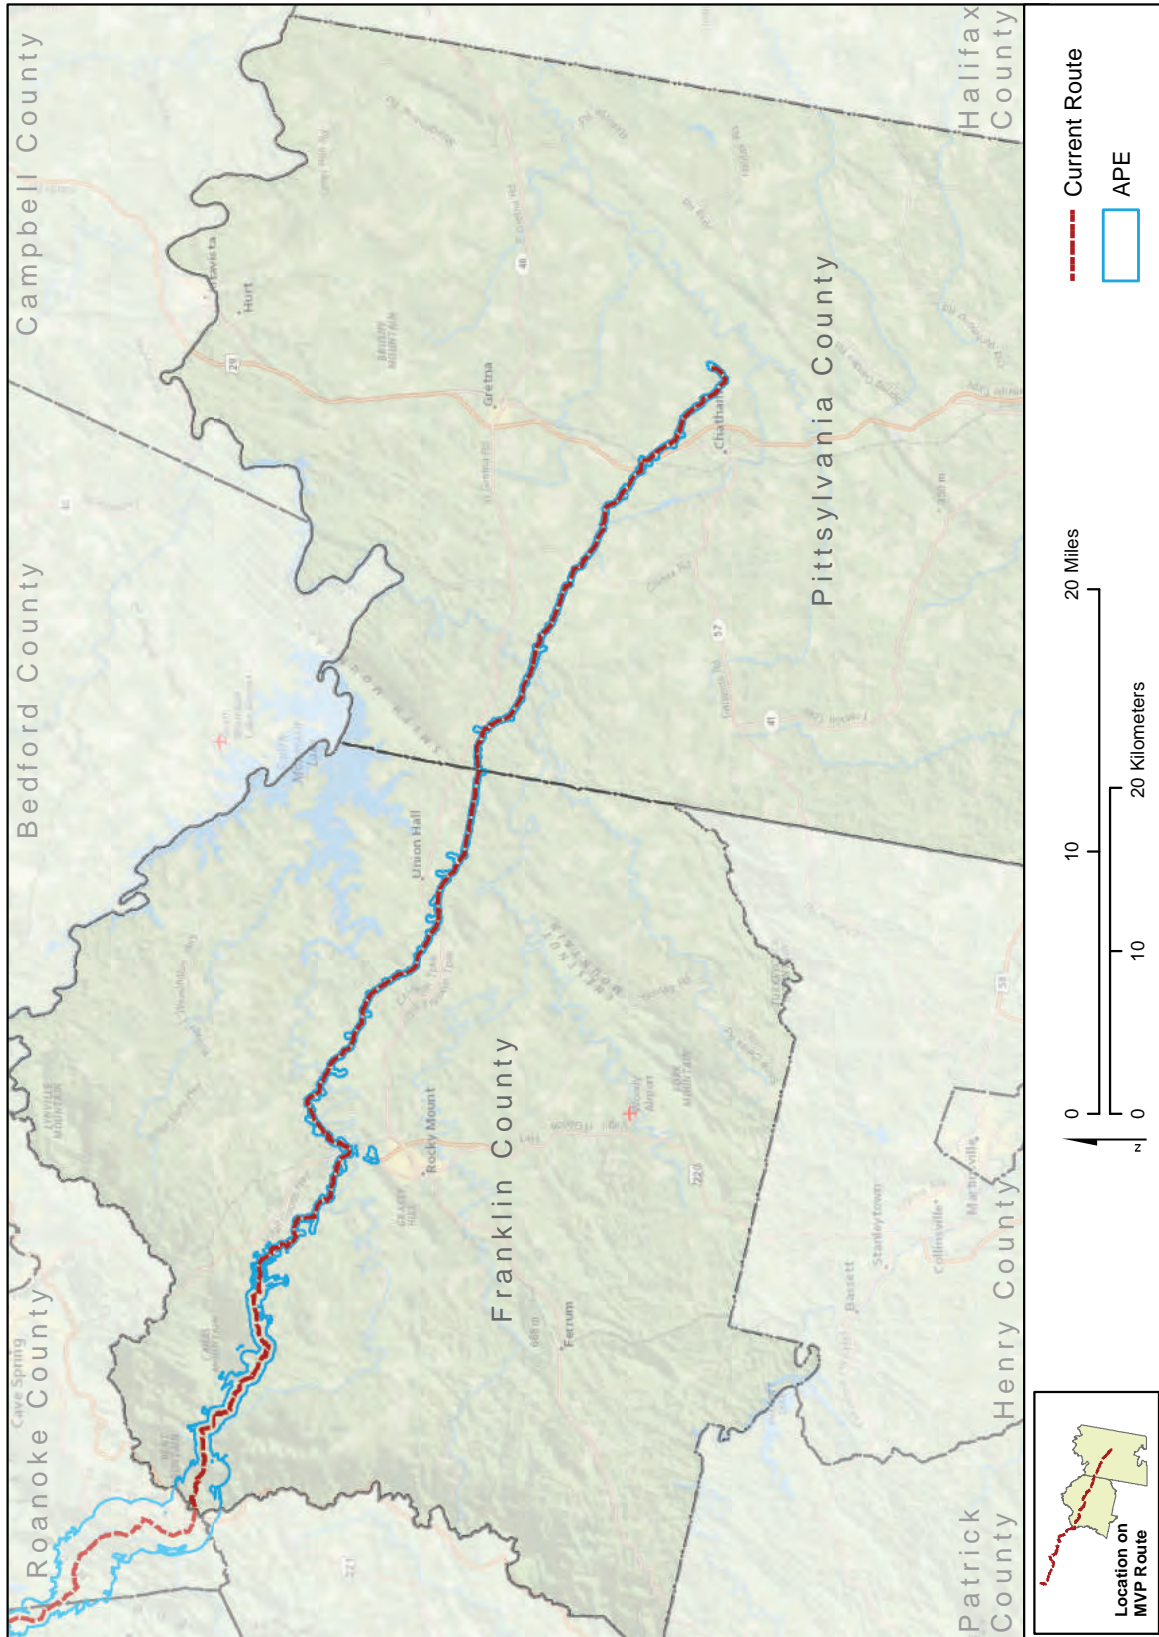

Figure 2. MVP Route Through Pittsylvania and Franklin Counties

## **II. FIELD METHODS AND EVALUATION CRITERIA**

This survey was conducted to evaluate historic buildings, structures, objects, sites or districts over 50 years of age for eligibility for the National Register of Historic Places (NRHP). Data collected included physical descriptions, locational data, photographs, and site plans for each resource. Architectural resources identified during field survey were recorded in the online database Virginia Cultural Resources Information System (V-CRIS). Resource locations are shown in Appendix A. Site maps and photographs for each resource are included in Appendix B. When a resource is listed in, or recommended eligible for listing in, the NRHP, photographs are included in the results of this report (Section III). In some cases, resources were not accessible to the New South architecture field team and archaeological field teams recorded the inaccessible resources. The resulting data was conveyed to the New South historians, who entered it into V-CRIS, and created site records for these architectural properties observed by the archaeologists.

New South Historians Ellen Turco, Robbie Jones, and field assistant Laura van Opstal, conducted the fieldwork. Historian Jenna Pirtle assisted with data entry and file preparation. Ms. Turco served as Principal Investigator. Ms. Turco and Mr. Jones meet or exceed the standards established for Historian and Architectural Historian by the U.S. Secretary of the Interior. Resumes are included in Appendix C.

### **NRHP Evaluation Criteria**

Each of the surveyed properties was evaluated for their eligibility for listing in the NHRP. Cultural resources are evaluated based on criteria for NRHP eligibility specified in the Department of Interior Regulations 36 CFR Part 60: National Register of Historic Places. Cultural resources can be defined as significant if they “possess integrity of location, design, setting, materials, workmanship, feeling, and association,” and if they are 50 years of age or older and:

- a) are associated with events that have made a significant contribution to the broad patterns of our history (history); or
- b) are associated with the lives of persons significant in our past (person); or
- c) embody the distinctive characteristic of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that components may lack individual distinction (architecture); or
- d) have yielded, or may be likely to yield, information important in prehistory or history (archaeology).

Ordinarily, cemeteries, birthplaces or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years are not considered eligible for the NRHP. However, such properties will qualify if they are integral parts of historic districts that do meet the criteria or if they fall within the following categories:

Criteria Consideration A: a religious property deriving primary significance from architectural or artistic distinction or historical importance; or

Criteria Consideration B: a building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or

Criteria Consideration C: a birthplace or grave of a historical figure of outstanding importance if there is no other appropriate site or building directly associated with his productive life; or

Criteria Consideration D: a cemetery which derives its primary significance from graves or persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or

Criteria Consideration E: a reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; or

Criteria Consideration F: a property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance; or

Criteria Consideration G: a property achieving significance within the past 50 years if it is of exceptional importance.

### III. RESULTS OF THE ADDENDUM PHASE I SURVEY

This additional fieldwork survey identified 34 resources within the APE for historic architectural resources including six previously recorded resources (Table 2). These 34 resources are in addition to the resources contained within the reports, *Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Pittsylvania County* and *Phase I Reconnaissance Architectural Survey for the Mountain Valley Pipeline, Franklin County*. Individual property descriptions are contained in this section. Maps showing the location of each resource are in Appendix A. Photos and site plans of each resource are in Appendix B. Resources recommended for additional study are denoted in the text.

**Table 2. Resources Surveyed in Pittsylvania and Franklin Counties Between October and December 2015 as part of Final Alignment**

| VDHR No.            | Name                                    | Location  | Date                  |

\* indicates previously surveyed resources with numbers already assigned by DHR

## **Pittsylvania County**

### **Dorothy Anne Teaman House 8777 Museville Road (Route 626), Sandy Level, Pittsylvania County VDHR No. 071-5157**

This circa-1910 dwelling is on a 25-acre parcel on the northwest side of Museville Road. Reforestation has reclaimed all land west of the dwelling. Also on the property are a gabled-roof, frame barn, a collapsed outbuilding southwest of the house, and a log barn with a front-gable, metal roof, a continuous stone foundation and a shed on the north elevation.

The dwelling is a two-story, L-form Vernacular building. Its exterior appearance dates to the early twentieth century; however, the V-CRIS entry states there may be an earlier circa 1850 log section. Its walls are clad with weatherboards, and it is surmounted by a standing-seam metal, hipped roof. A hipped-roof porch is located at the intersection of both hipped-roof sections on the east (front) elevation. Under the porch are two wood single-leaf paneled doors. There are three-over-one and six-over-six wood sash windows. Brick exterior end chimneys are located at the ends of both hipped-roof sections. A lean-to addition extends from the north end of the dwelling and has an enclosed shed-roof porch. The dwelling is vacant and in poor condition.

This resource is an abandoned and deteriorating Vernacular dwelling. The surviving outbuildings are also in various stages of deterioration. The farm no longer possesses intact cultivated fields. Reforestation has occurred surrounding the open areas containing the buildings. As such, the property lacks associative, historic landscape features and its integrity of setting has been diminished. For these reasons, the resource is recommended not eligible for the NRHP under Criteria A, B, or C.

### **McDaniel Tobacco Barn 2351 Anderson Mill Road (Route 649), Chatham, Pittsylvania County VDHR No. 071-5465**

This barn stands in a wooded area at the edge of a cultivated field on a 40-acre parcel on the south side of Anderson Mill Road.

This resource consists of a single twentieth-century V-notched log tobacco barn. A 2012 V-CRIS record indicated there were two barns on the parcel, but only one barn was observed during the present survey. The barn has a metal roof and a stone foundation. The logs are chinked with mud daubing. Tobacco leaves from a long ago harvest are hanging from rafters. This barn was not visible from the public right-of-way and was recorded by Tetra Tech's archaeological field crew.

This circa-1940 stand-alone barn is not obviously associated with other barns or agricultural buildings that could place it within a historic context or landscape. The barn does not appear to possess significance of design or construction. This tobacco barn was recorded as part of Preservation Virginia's Pittsylvania Tobacco Barn Survey (2014-2015) and was recommended not eligible for the NRHP under Criterion A, B, or C. No changes are recommended to its NRHP status.

**Oak Grove Christian Church and Cemetery**  
**20581 U.S. Highway 29, Chatham**  
**VDHR No. 071-5483**

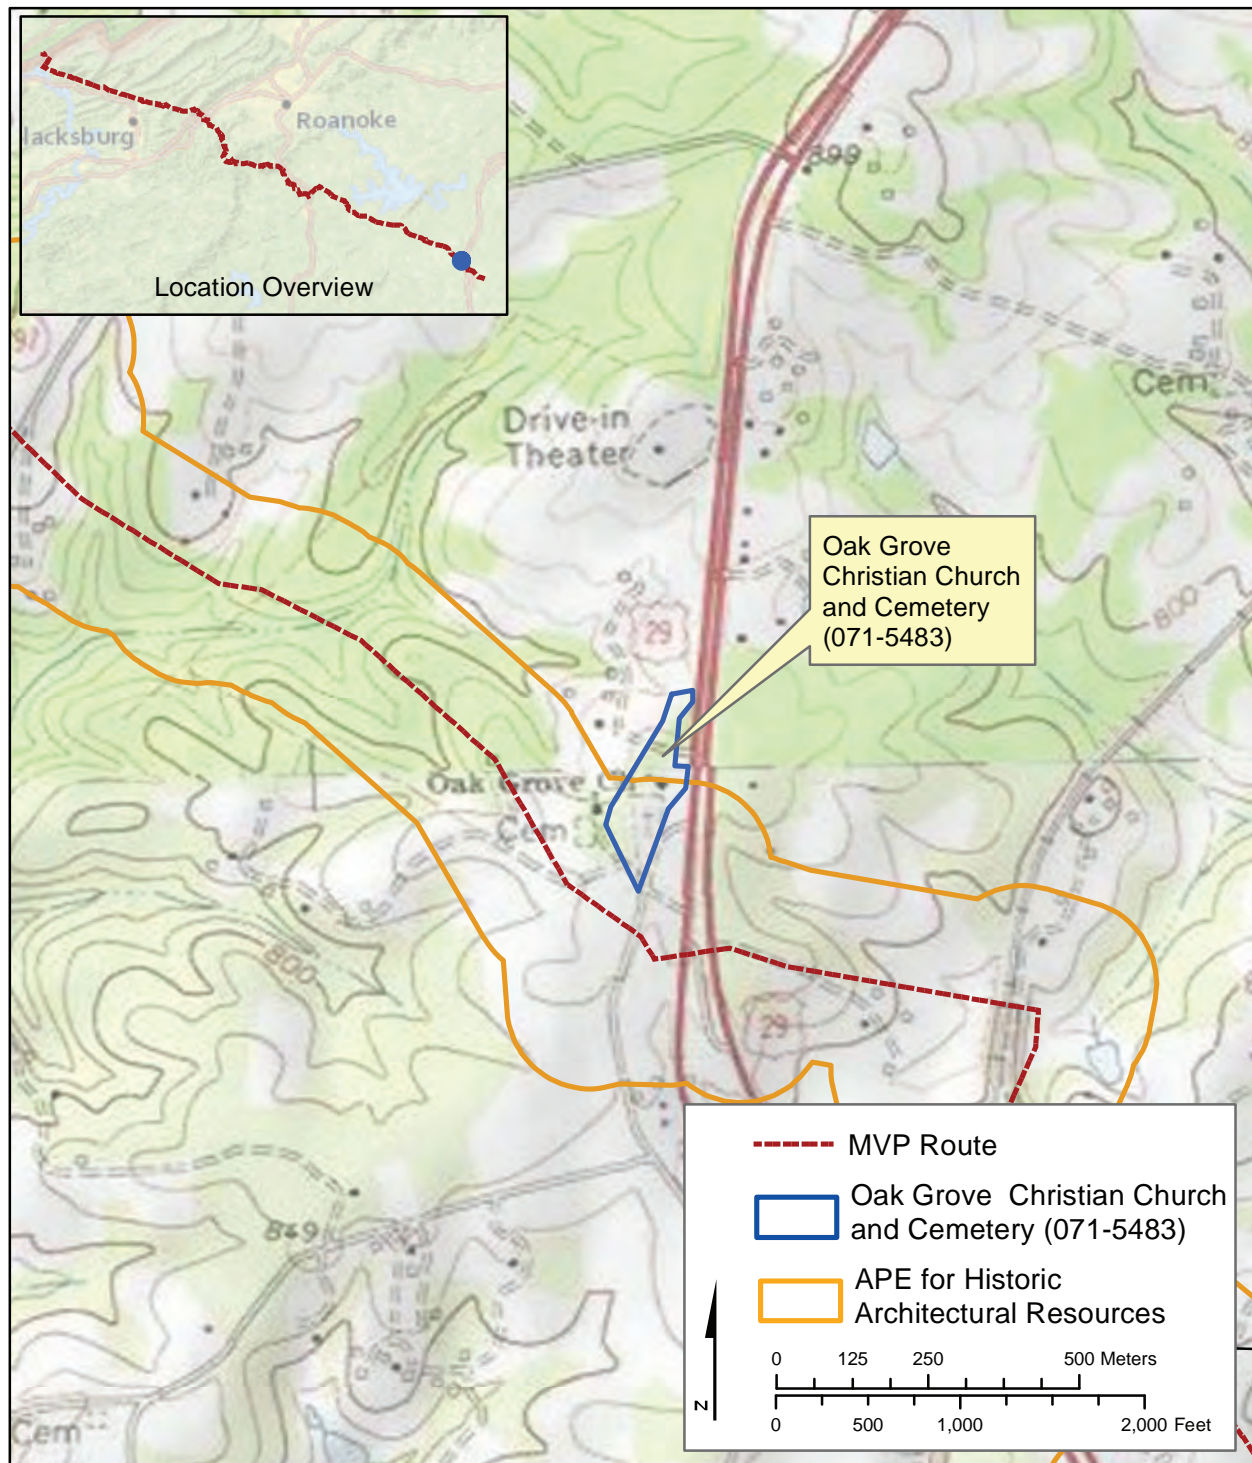

This circa-1900 church and cemetery is located on a 1.2-acre parcel on the west side of U.S. Highway 29 (Figure 3; Photograph 1). The cemetery is situated south of the church and a paved loop driveway off of U.S. Highway 29 accesses both. Northwest of the church is a modern open-air picnic shelter and a modern prefabricated metal storage shed.

The circa-1900 Gothic Revival-styled church features a front-gable roof and a projecting front entry vestibule surmounted by a square bell-tower with mid-level arched openings that expose the forged iron church bell. The tower has a pyramidal roof. The church has been enlarged in multiple phases with a rear wing on the west side, constructed in phases between 1950 and 1975, and a circa 1925 small side wing on the north elevation. The side-gable rear wing connects to the church with a hyphen. The church has been altered with vinyl siding. There are stained glass windows in the main block of the church, six-over-six wood and two-over-two horizontal metal sash windows in the hyphen and nine-over-nine wood sash windows in the rear wing. The church sits on stone and concrete foundations.

Oak Grove Christian Church Cemetery contains approximately 100 burials and gravestones consisting of upright granite slab headstones that face east toward the highway and are arranged in regular rows from north to south. The earliest marked stones date from 1923 and 1932. There are no borders or circulation networks within the well-maintained cemetery, and there is no evidence of funerary plantings. Graves are decorated with artificial flowers.

This resource is a well-preserved example of a turn-of-the-twentieth-century rural church. The only alteration observed was the application of vinyl siding, and the additions, which may possess historic or architectural significance. The vinyl siding erodes the resource's materials integrity, but the building retains its basic form, design and construction and its Vernacular Gothic Revival style. The associated cemetery contributes the church's historic setting. It is not known if the church may possess significance under Criteria A or B, for possible associations with person or events. New South Associates recommends further research and an intensive survey in order to make an individual NRHP eligibility determination for this property.

**Photograph 1. Oak Grove Christian Church and Cemetery (071-5483), View West**

**Farm**  
**Dual Track Road, Chatham, Pittsylvania County**  
**VDHR No. 071-5515**

This abandoned farmhouse is located on a 33-acre parcel on the west side of Dual Track Road near the intersection with U.S. Highway 29 and the east of side of the Southern Railroad tracks. The vacant and deteriorated farm was not accessible but was visible from the main road. The property has overgrown agricultural fields and an overgrown yard immediately around the house. The parcel retains several log tobacco curing barns.

The circa-1900 two-story, two-bay frame Vernacular I-house features a side-gable roof with end returns, a large two-story rear ell with a side porch and a partial-width shed front porch on turned posts. The exterior walls are covered with weatherboard siding. There is an exterior end brick chimney on the east side. The six-over-six wood sash windows remain intact. The roof is covered with metal and the dwelling rests on a stone foundation.

This abandoned I-house is intact but vacant. The surviving tobacco barns are unused and in various stages of deterioration. The outbuildings are not significant examples of any particular building technique or type. Due to the condition of the primary resource and the lack of distinction among the outbuildings, the resource is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**127 Jackson Lane, Chatham, Pittsylvania County**  
**VDHR No. 071-5516**

This abandoned house is on a 5.5-acre parcel on the east side of Jackson Lane at the intersection with Neighborhood Road. The property is wooded to the north and east with an overgrown lawn to the east and south. South of the house is a concrete block shed.

The circa-1900 one-and-half-story Vernacular frame house features a side-gable metal roof, a concrete block flue on the east side, and a concrete block foundation. The house has been altered with synthetic siding, an enclosed front shed porch on the north elevation, a hipped-roof rear wing, one-over-one replacement windows and replacement doors.

This house is in poor condition and lacks integrity due to changes to the original siding material and windows. It is an altered and unremarkable example of an early twentieth-century house that lacks stylistic associations, and distinctive architectural, design and construction features. The resource is not known to have associations with events or persons significant in the past. Therefore, the resource is recommended not eligible for the NRHP under Criteria A, B, or C.

**Jackson House**  
**140 Jackson Lane, Chatham, Pittsylvania County**  
**VDHR No. 071-5517**

This house faces east on a 0.5-acre parcel on the west side of Jackson Lane near the intersection with Neighborhood Road. Northwest of the house is a detached carport and there are two sheds to the southwest. The property is well maintained and exhibits modern fencing, landscaping, and a large yard.

The circa-1900 one-and-half-story Vernacular frame house features a side-gable “catslide” roof. There are gabled additions on the rear and south sides. The gabled front porch is a later replacement and is supported by modern columns. The house has been altered with replacement windows, replacement doors, and vinyl siding. The roof is covered with asphalt shingles and the foundation is concrete block. No chimney was observed.

This house lacks integrity due to changes to the original siding material and windows and the multiple additions. It is an altered and unremarkable example of an early twentieth-century house that lacks stylistic associations, and distinctive architectural, design and construction features. The resource is not known to have associations with events or persons significant in the past. Therefore, the resource is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**179 Jackson Lane, Chatham, Pittsylvania County**  
**VDHR No. 071-5518**

This circa-1964 Ranch-style house faces west on the east side of Jackson Lane near the intersection with Neighborhood Road. The 0.7-acre parcel has a detached metal carport west of the house. The property features mature trees and a lawn.

The side-gable brick Ranch has a carport at the north end and a rear wing. A brick chimney projects from the front roof slope. Fenestration includes original two-over-two horizontal sash windows, a picture window and a solid wood front door. The roof is covered with asphalt shingles and the foundation is concrete block. The house also features a brick planter along the façade foundation and a brick barbeque at the rear.

The resource is an example of a popular mid-twentieth-century house type, the Ranch, which is found in great numbers in both rural and urban areas across the state. This modest example lacks distinctive architectural, design and construction features and does sufficiently embody the Ranch style. The resource is not known to have associations with events or persons significant in the past. Therefore, the resource is recommended not individually eligible for the NRHP under Criteria A, B, or C.

**Farm**  
**19808 U.S. Highway No. 29, Chatham, Pittsylvania County**  
**VDHR No. 071-5519**

Located on the east side of U.S. Highway 29, this farm features a dwelling, agricultural fields, farm outbuildings, a metal carport and a roadside commercial building on 259 acres. A modern power line traverses the farm, running through the barnyard and along U.S. Highway 29. The split driveway leads to the dwelling and to a gravel parking lot serving the commercial building. The commercial building has an elongated front gabled form and a front shed porch. It has vinyl siding, with the exception of the front elevation, which is brick veneer, and a metal roof. A modern detached metal carport is south of the house. Southeast of the house are several agricultural outbuildings, including four tobacco barns and two sheds. Two of the tobacco barns are located in a tree line running east-west. The agricultural outbuildings appear to date from the early twentieth century and predate the Ranch house.

The circa-1960 side-gable brick Ranch house has a center-bay, shed-roof front porch supported by square columns and a gable-roof side porch supported by metal columns. A brick interior flue projects from the front roof slope. There is vinyl siding in the gables and the windows are replacement one-over-one horizontal sashes. The roof is covered with asphalt shingles and the foundation is concrete block.

The resource is an example of a popular mid-twentieth-century house type, the Ranch, which is found in great numbers in both rural and urban areas across the state. This modest example lacks distinctive architectural, design and construction features and does sufficiently embody the Ranch style. The extant outbuildings are not examples of any particular building type or construction technique and are not significant independent of the main dwelling. The buildings as a group do not strongly convey rural or agricultural life. The resource is not known to have associations with events or persons significant in the past. Therefore, the resource is recommended not individually eligible for the NRHP under Criteria A, B, or C.

**Barns**  
**1309 Riddle Road (Route 797), Chatham, Pittsylvania County**  
**VDHR No. 071-5520**

These barns are located at the edge of an abandoned agricultural field on the south side of Riddle Road. The circa-1930 frame barns were inaccessible but had rectangular plans and side-gable roofs covered with sheet metal.

These barns are of common form and construction materials and do not possess sufficient historical or architectural significance. They did not appear to be associated with a primary resource or larger farmstead. Therefore, the resource is recommended not eligible for the NRHP under Criteria A, B, or C.

**Farm**  
**1445 Riddle Road (Route 797), Chatham, Pittsylvania County**  
**VDHR No. 071-5521**

Located on a 10.9-acre parcel on the south side of Riddle Road and east of Pole Bridge Creek, this farm retains a Vernacular house and several agricultural outbuildings such as frame sheds and barns, and a log barn south of the house. A modern mobile home is located east of the house. The property is well maintained, featuring mature trees and agricultural fields to the north and east, and a wooded area to the west and south.

The circa-1890 two-story, double-pile farmhouse has a side-gable roof, a one-bay central entry portico supported by square wood posts, and a two-story rear ell with a one-story side shed addition. The house has been altered with vinyl siding, and a large shed-rood addition with an enclosed front porch on the south side. Original six-over-six windows remain in the oldest section of the dwelling. They are deeply set suggesting the house is constructed of logs. The roof is covered with metal and the foundation and exterior end chimney are stone.

This resource is a nineteenth-century farmhouse that has been substantially altered with vinyl siding and additions to the side and rear. Due to its altered form and lack of materials integrity, the dwelling is not representative of its style, type or time period. The buildings as a group do not strongly convey rural or agricultural life. The property is not known to have associations with events or persons significant in the past. Therefore, the resource is recommended not individually eligible for the NRHP under Criteria A, B, or C.

**House**  
**13685 West Gretna Road (Route 40), Sandy Level, Pittsylvania County**  
**VDHR No. 071-5522**

This circa-1960 Ranch house is located on a 1.5-acre parcel on the southwest side of West Gretna Road. This parcel, and an adjacent one to the south, contains metal covered open sheds, a detached open metal carport, and two buildings that may be former dwellings converted to agricultural and/or domestic storage south of the house. The grassy yard immediately surrounding the house is populated with mature hardwood trees.

The side-gabled brick Ranch house has an interior central brick chimney, a façade picture window, and an attached carport supported by metal columns at the east end. The house has been altered with replacement one-over-one sash windows, replacement doors, and vinyl siding in the eaves. The roof is covered with asphalt shingles and the foundation is continuous brick.

The resource is an example of a popular mid-twentieth-century house type, the Ranch, which is found in great numbers in both rural and urban areas across the state. This modest example lacks distinctive architectural, design and construction features and does sufficiently embody the Ranch style. The extant outbuildings are not examples of any particular building type or

construction technique and are not significant independent of the main dwelling. The resource is not known to have associations with events or persons significant in the past. Therefore, the resource is recommended not individually eligible for the NRHP under Criteria A, B, or C.

**Transco Transfer Station No. 165**  
**945 Transco Road (Route 692), Chatham, Pittsylvania County,**  
**VDHR No. 071-5524**

This resource is the Transco Transfer Station No. 165 at the eastern terminus of the project. This approximately 10-acre isolated facility is located on the south side of Transco Road approximately one mile east of the intersection with Chalk Level Road. A chain link fence topped by barbed wire surrounds the facility.

The transfer station is one of 56 compressor stations constructed along the Transcontinental Pipeline (Transco), a 42-inch-diameter natural gas pipeline that carries gas from the Gulf Coast to the Northeast. The 10,200-mile long pipeline extends from South Texas to New York City and is a major provider of natural gas to 12 states in the Southeast and Atlanta Seaboard, including major metropolitan areas in New York, New Jersey, and Pennsylvania. The compression station facility was constructed by the Houston-based Transco Energy Company, which was incorporated in 1948 as the Transcontinental Gas Pipe Line Corporation. The main gas pipeline was built between May 1949 and January 1951.

The transfer station facility features 20-25 buildings and structures. Many of these buildings are modern prefabricated metal structures on concrete slabs. The largest building is a long, rectangular structure with a metal gable roof, corrugated metal panel walls, metal casement windows, metal doors, and a poured concrete foundation. This building appears to date from the opening of the compression station facility around 1950.

This resource is an example of a mid-twentieth-century natural gas transfer and compression station that features utilitarian buildings and structures of prefabricated metal and concrete construction. Only one building is estimated to be over fifty years of age. The facility is one of 56 similar compression stations along the 10,200-mile natural gas pipeline and has no known historical or architectural significance. The resource is recommended not eligible for the NRHP under Criteria A, B or C.

**Cemetery**  
**640 Green Bay Road, Chatham**  
**VDHR No. 071-5506**

This resource is a small, unmarked cemetery of two burials located within a wooded area between Old Red Eye Road and Green Bay Road. It may be associated with the Pearson's homestead recorded on the parcel property records. The burials are marked with undressed

fieldstones and appear to be oriented on an east-west axis. No enclosure was noted and no inscriptions were recorded. Tetra Tech's archaeological field crew recorded this cemetery. No photos.

The cemetery does not exhibit distinctive funerary artistic work or design features nor is it known to be associated with a particular historic event or persons of transcendent importance. Therefore, the cemetery does not meet NRHP Criterion Consideration D and is recommended not eligible for the NRHP under Criteria A, B or C.

**Tobacco Barns**  
**1320 Green Bay Road, Chatham**  
**VDHR No. 071-5507**

These two log tobacco barns are located on a 128-acre parcel at the edge of a field between Green Bay Road and Old Red Eye Road.

The gabled barns are built of log and have metal roofs. They are overgrown and deteriorated with one of the barn roofs in a state of collapse. Tetra Tech's archaeological field crew recorded this resource.

These barns in poor condition and do not appear to be associated with a primary resource or larger farmstead. The resource as a whole is not in sufficient condition to be evaluated for the NRHP; therefore, it is recommended not eligible for the NRHP under Criteria A, B, or C.

**House Ruin**  
**141 Dry Bridge Road**  
**VDHR No. 071-5508**

This house ruin sits on a 77-acre parcel on the south side of Dry Bridge Road. The house faces west. Other outbuildings on the site include a ruinous tobacco barn on a stone foundation and a square, water-filled hole in the ground that may have been a pit cellar.

The circa 1900 house was built in two stages. One part is constructed of exposed log, the other is wood frame covered with weatherboards. The log portion is nearly entirely collapsed. The metal side gable roof is collapsing. The two exterior stone chimneys are also collapsed. The house ruin sits on a stone foundation which has been partially covered in weatherboards. The interior of the frame portion has a still-standing staircase to the second floor. Tetra Tech's archaeological field crew recorded this resource.

The resource as a whole is not in sufficient condition to be evaluated for the NRHP; and therefore, it is recommended not eligible under Criteria A, B, or C.

## **Franklin County**

**Peters Farmstead**  
**2241 Cahas Mountain Road (Route 742)/405 Tench Creek Drive,**  
**Boones Mill, Franklin County**  
**VDHR No. 033-0388**

Located on the east side of Cahas Mountain Road, this farmstead features two dwellings and several outbuildings on two legal parcels. Situated on a wooded hillside overlooking adjacent farmland, are two historically related dwellings: a circa 1900 house on a 22-acre parcel with the address of 405 Tench Creek Drive; and a circa 1925 house on three-acre parcel nearest Chahas Mountain Road. The properties have several outbuildings, including a large circa 1900 frame barn, now in ruins; a circa 1930 frame garage; a circa 1900 corncrib; a cinderblock building; and a circa 1900 farm equipment shed. In recent years, the periphery of the farm has been subdivided for the construction of new homes.

The main farmhouse at 2241 Cahas Mountain Road is a 2.5-story American Foursquare constructed in 1925 for farmer Newton C. Peters, by local carpenters Hayden Gibson and Willsie Peters. The house features a hipped metal roof, a hipped dormer, interior central brick chimney, one-over-one wood sash windows, vinyl siding, and a concrete block foundation. Circular wooden columns support the single-story, hipped roof front porch. A two-story ell with an enclosed porch extends from the rear elevation. The secondary dwelling is a heavily altered circa-1900 two-story frame house with a saddlebag plan, side-gable metal roof, vinyl siding, a stone foundation, and circa 2012 single-story side wings.

This resource is an example of an early twentieth-century farmstead featuring two dwellings and several outbuildings that are common examples of their types. Both dwellings have been altered with modern renovations and additions. The primary barn is in ruins and much of the farm has been subdivided for construction of new homes. The farmstead does not retain integrity. The resource is recommended not eligible for the NRHP under Criteria A, B, or C.

**Flora Farmstead**  
**40 Floradale Farms Lane, Boones Mill, Franklin County**  
**VDHR No. 033-0389**

Located on the east side of Cahas Mountain Road, this 56-acre farmstead is anchored by a circa-1824 brick farmhouse with a circa-1880 front wing addition (Figure 4; Photograph 2). The house faces southwest towards a small creek and is surrounded by hilly cattle pastures. North of the dwelling is a modern one-bay gabled garage and beyond the garage on a rise is a shed-roof chicken coop/livestock shelter. The property's large livestock barns are east of the house and include two elongated gabled livestock barns and a metal-covered shed on the north side of an unpaved farm path and a side-gable equipment shed and weatherboard-covered gabled livestock

barn on the south side of the path. On the east side of Cahas Mountain Road is a circa 1950 brick Minimal traditional dwelling that is historically associated with the family.

The house is a circa-1824 two-story, side-gabled brick Federal-style dwelling featuring a hall-and-parlor floorplan. Around 1918, a two-story hipped-roof frame addition was appended at a right angle onto the brick dwelling's southwest façade. An L-shaped hipped-roof porch on turned posts spans the old and "new" sections of the house. The circa-1824 section has side-gable metal roof, brick exterior end chimneys, and original six-over-six sash windows. This section features fine brickwork such as the reverse curve brick cornices and the first floor door and window openings surmounted by flat arches formed by over-sized bricks. The circa 1918 wing has a metal roof, original two-over-two sash windows, vinyl siding, and a concrete block foundation. The circa-1818 wing has been enlarged with a small shed on the northwest side. The Flora family has owned the farm since the 1880s.

This Flora Farm property contains a well-preserved Federal-period dwelling that was expanded in the early twentieth century. With the exception of the vinyl siding on the 1918 wing, both sections retain materials integrity. The presence of the original windows in the circa 1824 section is notable. The circa-1918 porch replaces the original one, but it serves to integrate the two parts of the dwelling and illustrates how the building evolved over time. The outbuildings appear to be twentieth-century agricultural buildings that contribute to resource's rural setting. The property has been associated with the Flora family since the 1880s, but their significance in local events is unknown. The VDHR determined the Flora Farmstead potentially eligible for listing in the NRHP in 1995. Additional architectural survey and background research is recommended to fully evaluate the Flora Farm's eligibility for listing in the NRHP.

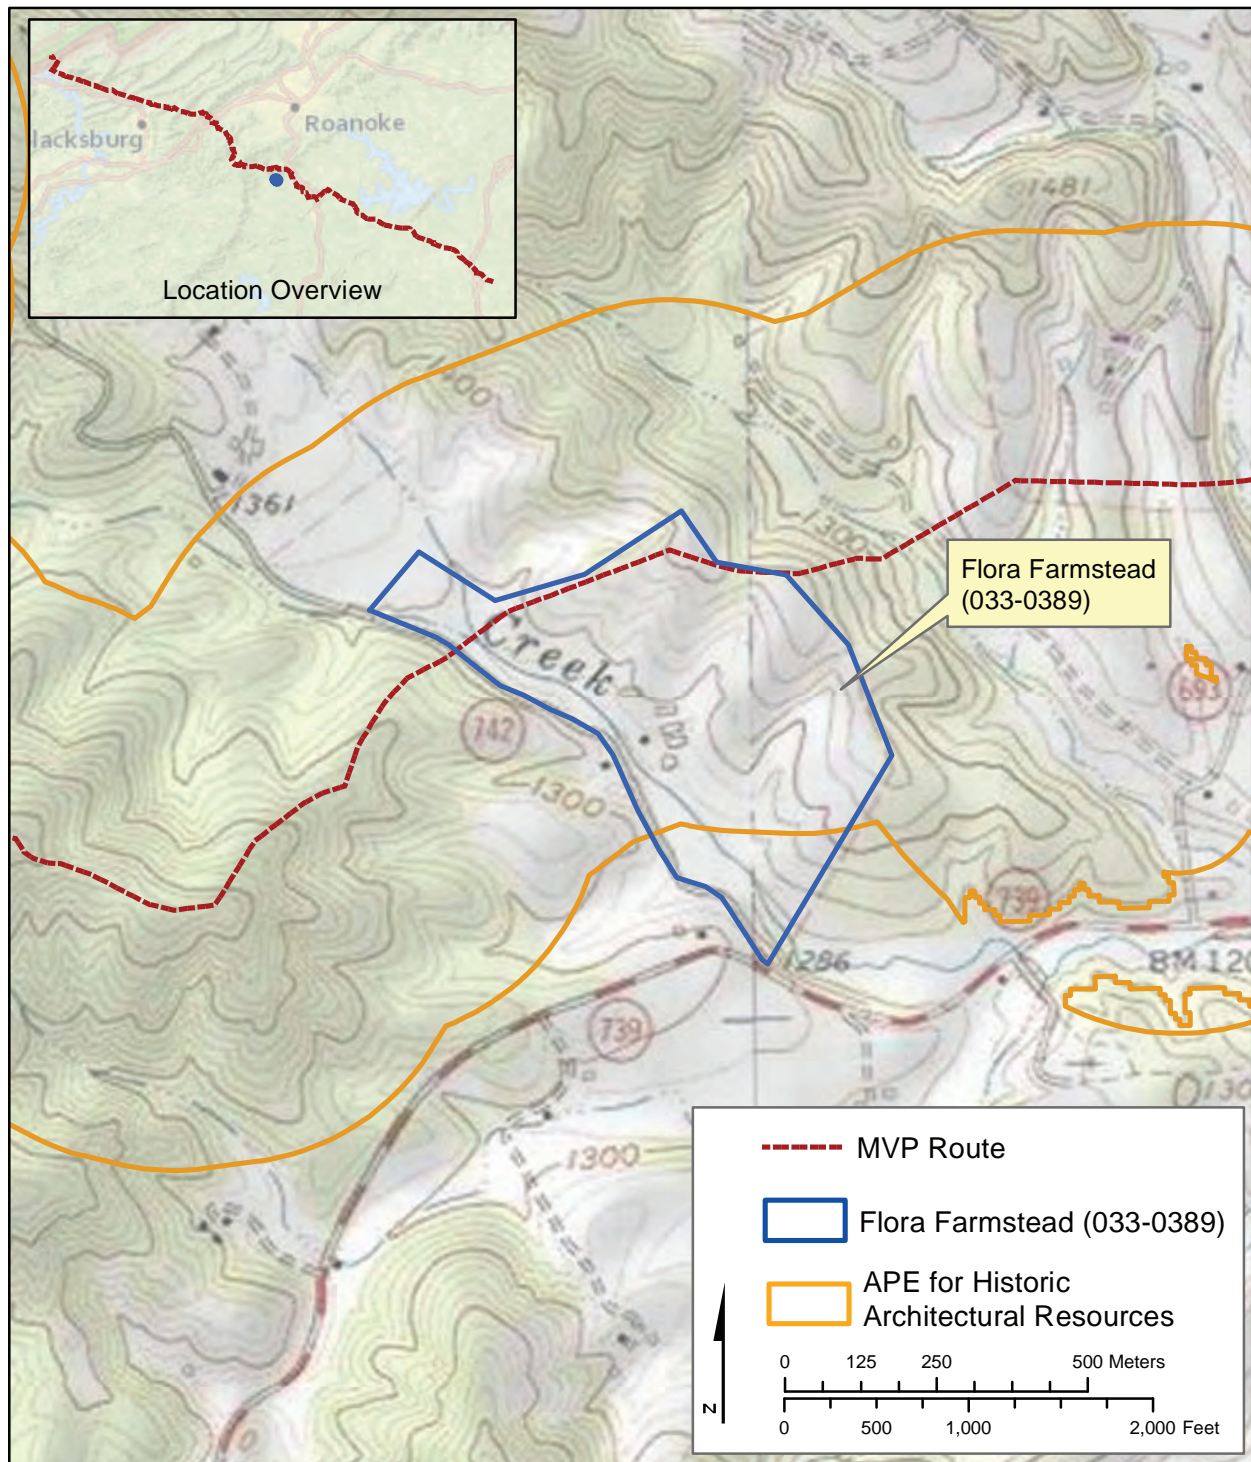

**Mattox Cemetery**  
**128 Turtle Hill Road (Route 869), Union Hall, Franklin County**  
**VDHR No. 033-5183**

This large, active cemetery is on an approximately 0.5-acre parcel at the northeast corner of the intersection of Brooks Mill Road and Turtle Hill Road. Mowed grass covers the cemetery and historic plantings include yucca, boxwood, and mature oak trees.

Approximately 95 marked graves were observed. Marker materials include soapstone, marble, and granite. Burials are oriented on an east-west axis as is typical of Christian burials. Unmarked graves may be present. Burials range between the years 1873 and 2000. Fencing and circulation roads or paths were not observed.

The cemetery does not exhibit distinctive funerary artistic work or design features nor is it known to be associated with a particular historic event or persons of transcendent importance. Therefore, the cemetery does not meet NRHP Criterion Consideration D and is recommended not eligible for the NRHP under Criteria A, B or C.

**Figure 4. Map Showing Location of Flora Farmstead (033-0389)**

Source: USGS 7.5 Minute Quadrangle Maps, Callaway, VA (1964), and Boones Mill, VA (1979)

**Photograph 2. Flora Farmstead (033-0389), View Northeast**

**Cemetery**  
**831 Webster Road (Route 655), Glade Hill, Franklin County**  
**VDHR No. 033-5376**

This cemetery is situated on a 1.1-acre parcel on the north side of Webster Road and the east side of Golden View Road. It sits in a cleared field and is marked by a mature deciduous tree. The property owner stated the resource may be a slave cemetery. However, this was not confirmed because the property owner did not allow access to the cemetery or photography. Tetra Tech's archaeological field crew recorded this cemetery.

**Farm Ruins**  
**5535 Grassy Hill Road, Rocky Mount, Franklin County**  
**VDHR No. 033-5377**

Located on a 127-acre parcel on the east side of Grassy Hill Road, this resource consists of the abandoned ruins of a farm with a circa-1910 house and five outbuildings. The house is set in an overgrown yard within a larger wooded area and surrounded by agricultural fields. The outbuildings to the north were not visible from the road and were recorded by Tetra Tech's archaeological field team. All of the outbuildings, a side-gable dairy with a poured concrete foundation; a two-story gabled barn with German siding; a front-gable outbuilding; a shed-roofed chicken coop with weatherboard siding; and a privy with vertical plank siding, are frame with metal roofs.

The circa-1910 two-story frame house has a hip-roof covered with pressed tin shingles, two interior central brick chimneys, and weatherboard siding. The front porch and windows have been removed.

The buildings that comprise this abandoned farmstead are being consumed by vegetation and are deteriorating. The resource as a whole is not in sufficient condition to be evaluated for the NRHP; and therefore, it is recommended not eligible under Criteria A, B, or C.

**Outbuildings**  
**573 Wildwood Road (Route 693), Boones Mill, Franklin County**  
**VDHR No. 033-5378**

This resource consists of two outbuildings on the north side of Wildwood Road, approximately 0.5 miles northeast of the house that shares this address (033-5386). The abandoned resources are in an overgrown field. The first is a shed-roof shed with vertical plank siding; the other resource is the remains of a field stone wall or foundation.

These resources are isolated finds that do not appear to be related to a larger, proximate farmstead. They have no obvious historic context and are in poor condition. For these reasons, they are recommended not eligible for the NRHP under Criteria A,B or C.

**House**  
**356 Foggy Ridge Road, Rocky Mount, Franklin County**  
**VDHR No. 033-5380**

This circa-1945 dwelling is located on an 8.05-acre parcel on the west side of Foggy Ridge Road south of the intersection with Iron Ridge Road. The property has a gabled frame shed and detached garage, which is connected to the west side of the house with an open breezeway. The front gable, one-bay garage is covered in vinyl siding and has a metal door. A lawn surrounds the house. Mature tree stands are on the north, west, and south sides and an agricultural field is to the east.

This vacant Minimal Traditional-styled one-story, frame house features a cross-gable roof covered with asphalt shingles, a corner shed porch supported by metal posts, one-over-one wood sash windows, an exterior brick chimney, and a masonry foundation. The house has been altered with synthetic siding and a large modern rear addition with a central brick chimney.

This resource is a typical example of a mid-twentieth-century house type. This particular example lacks distinctive architectural features and historic materials integrity. The extant outbuildings do not appear to be over 50 years of age. The property is not known to have associations with events or persons significant in the past. For these reasons, the house and outbuildings are recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**1418 Brick Church Road, Rocky Mount, Franklin County**  
**VDHR No. 033-5382**

This circa-1900 house is located on a 1.8-acre parcel on the south side of Brick Church Road. The house faces northwest. Northeast of the house are a prefabricated metal shed and a one-bay frame front-gable garage. The parcel is surrounded by modern suburban residential development.

This house appears to be a circa-1900 Vernacular form that was substantially renovated with modern materials in the 1950s. The one-story, side-gable dwelling has a shed addition and a hipped-roof addition on the rear and a partial-width front shed porch with turned posts and a square picket balustrade. The exterior walls are covered with stone veneer. The windows are two-over-two horizontal sashes and the entry door, under the porch, is solid slab door with three small windows across the top. The roof is covered with asphalt shingles and the foundation is concrete. No chimneys were observed.

This resource is a greatly altered Vernacular dwelling. It no longer possesses physical characteristics or materials from its original period of construction, circa 1900. As a 1950s-era-renovated house, it lacks distinctive architectural design and construction features and does sufficiently embody the Ranch style. The property is not known to have associations with events or persons significant in the past. For these reasons, this resource is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**

**1407 Brick Church Road (Route 697), Rocky Mount, Franklin County  
VDHR No. 033-5383**

This resource sits on a 34.6-acre parcel on Brick Church Road. The property retains the remnants of a turn-of-the-twentieth-century farm. In addition to the main dwelling, the parcel retains a frame one-bay garage southwest of the house and frame sheds to the north. In the modern period, the parcel was subdivided and a circa 1989 mobile home and a circa 1992 dwelling were built. According to historic aerial photographs and maps, many of the original agricultural outbuildings have been demolished.

The circa 1912 two-story, three-bay Vernacular I-house has a two-story rear ell with enclosed side porches and a single-story full-width hip-roof front porch supported by replacement metal posts. There is an interior brick chimney at the west end. The windows are original two-over-two wood sashes. Vinyl siding covers the house. The roof is metal and the foundation is made of replacement concrete blocks.

This resource is the remains of an early twentieth-century farm anchored by an altered I-house. The integrity of the house has been diminished by the installation of vinyl siding and a new foundation. Historic aerial photographs indicate most of the outbuildings are no longer standing. The extant outbuildings are not examples of any particular building type or construction technique and are not significant independent of the main dwelling. The buildings as a group do not strongly convey rural or agricultural life. The property is not known to have associations with events or persons significant in the past. For these reasons, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**

**120 Monty Road (Route 828), Boones Mill, Franklin County  
VDHR No. 033-5384**

This circa-1930 house is located on a 1.3-acre parcel the west side of Monty Road south of the intersection with Bethlehem Road. North of the house is a detached brick garage with a metal gable roof and vinyl siding in the gables. Historic aerial photographs and maps indicate that several agricultural outbuildings and barns have been demolished. After 2010, the farm was subdivided and developed into the King's Grant residential subdivision.

The one-and-half-story, brick Craftsman-style Bungalow has a side-gabled roof, a front gable porch on brick piers and a front-gable dormer. A one-story rear shed, possibly an enclosed porch, spans the rear elevation. Two interior brick chimneys project through the asphalt shingle roof. The foundation is poured concrete. The house has been altered with replacement windows and doors, and vinyl siding on the trim and in the gables.

This resource is a typical example of an early twentieth-century Craftsman-style farmhouse lacking distinctive architectural features and materials integrity. The farm has been subdivided and the agricultural outbuildings replaced with modern residential development. The property is not known to have associations with events or persons significant in the past. For these reasons, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**573 Wildwood Road (Route 693), Boones Mill, Franklin County**  
**VDHR No. 033-5386**

This circa-1910 house is located on a one-acre parcel on the east side of Wildwood Road north of the intersection with Bethlehem Road. The property retains a detached garage, two farm equipment sheds, the ruins of a barn, as well as a circa-1950 brick barbeque south of the house. The house is in fair condition and surrounded by mature trees and shrubbery.

This two-story Folk Victorian-styled frame dwelling features a cross-gabled roof with an original central brick chimney, a one-story rear shed wing, and a hip roof wrap-around front porch supported by wood columns. There is an enclosed room at the corner of the porch. The house has been altered with replacement windows and doors, vinyl siding, a modern exterior brick chimney on the south elevation, and a partially enclosed front porch. The house is surmounted by a metal roof and rests on a concrete foundation.

The resource is a turn-of-the-twentieth-century Folk Victorian-styled house that has been altered by the installation of vinyl siding and windows. Due to these changes, the house is not an intact example of its style or period. The property is not known to have associations with events or persons significant in the past. Therefore, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**351 House Rock Road (Route 694), Boones Mill, Franklin County**  
**VDHR No. 033-5388**

This circa 1890;1910 house faces south on a 39.8-acre parcel on the west side of House Rock Road north of the intersection with Wildwood Road. The house sits on a cleared hillside overlooking hilly agricultural fields to the south. There are several outbuildings north of the house, including a frame shed and garage, two small frame sheds, and a large modern

prefabricated metal workshop. Historic aerial photographs and maps indicate several barns have been demolished.

The circa 1890;1910 frame house possesses elements of both the American Foursquare and I-house form. The front section is an I-house. The rear hipped-roof section appears to have been overbuilt, including a hipped front dormer. The house has been altered with replacement windows and synthetic vinyl siding. There are one-story hipped-roof porches on the front elevation and one that wraps around the rear and is partially screened. The porches have columns and decorative gable peaks. The roof is covered with asphalt shingles and the house rests on a poured concrete foundation. The front porch foundation is stone veneer.

This resource is an altered house erected in two phases. The vinyl siding and replacement vinyl windows erode the house's physical integrity; and therefore, it is not an intact example of a Vernacular dwelling. While the rural landscape is intact, the surviving historic outbuildings are not examples of any particular building type or construction technique and are not significant independent of the main dwelling. The buildings as a group do not strongly convey rural or agricultural life. The large modern workshop north of the house is out of scale with the house and outbuildings. The property is not known to have associations with events or persons significant in the past. Therefore, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**1025 Webster Corner Road (Route 744), Callaway, Franklin County**  
**VDHR No. 033-5389**

This circa-1900 house is located on a rise on a 10.3-acre parcel on the west side of Webster Corner Road. The house faces northeast and is accessed by a circular driveway. The property contains a second dwelling south of the historic dwelling, a circa 2005 one-and-a-half story side-gable house with stone veneer and wood siding. Northwest of the circa 1900 house are several agricultural outbuildings, including frame sheds and barns. Historic aerial photographs and maps indicate that additional barns and sheds are no longer extant.

The heavily modified two-story frame gable-and-wing Vernacular house has a one-story wrap-around hipped roof front porch, which has an enclosed room along one side. Battered posts on brick piers support the porch roof. The house's rear wing has a brick exterior end chimney. The original windows have been replaced and shutters have been added. The original siding has been replaced with a new type of unidentified siding, perhaps Hardyplank or Masonite. The roof is covered with asphalt shingles and the house rests on a concrete foundation.

The resource is a turn-of-the-twentieth-century Folk Victorian-styled house that has been altered by the installation of vinyl siding and windows. Due to these changes, the house is not an intact example of its style or period. The property is not known to have associations with events or

persons significant in the past. Therefore, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**280 Wades Gap Road (Route 726), Callaway, Franklin County**  
**VDHR No. 033-5390**

This circa-1948 dwelling is located on a 122-acre parcel on a rise on the east side of Wades Gap Road north of the intersection with Dillons Mill Road. The house faces northwest. South of the house are a child's playhouse and several frame sheds set within wood fencing. A large log barn with a metal roof is southeast of the house (no photograph).

The Minimal Traditional one-and-half-story house features a side-gabled roof with a front-gable dormer and an inset front porch at southwest corner. There is a single, square wood post supporting the porch's exterior corner. The house has been altered with vinyl siding and vinyl replacement windows. The house rests on a concrete block foundation with a partial basement. A central brick flue projects from the metal roof.

This resource is a typical example of a mid-twentieth-century house type, the Minimal Traditional. This particular example lacks distinctive architectural features and historic materials integrity. The extant outbuildings do not appear to be over 50 years of age. The property is not known to have associations with events or persons significant in the past. For these reasons, the house and outbuildings are recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**151 Wades Gap Road (Route 726), Callaway, Franklin County**  
**VDHR No. 033-5391**

This circa-1880 dwelling is located on 122.4-acre parcel on the west side of Wades Gap Road north of the intersection with Dillons Mill Road. The house is set in a rural setting in the North Fork River Valley. Wood fencing encloses the cleared horse pastures around the house. South of the house along the gravel access driveway is a circa-1920 frame bank barn with a metal roof and vertical plank siding and a circa 2000 gable-roof horse barn with board-and-batten siding and open sheds on the sides.

The Vernacular three-bay I-house has a two-story rear ell with a partially enclosed shed roof on the southwest side and a one-story, hipped-roof, one-bay central entry porch on the facade. Two brick interior chimneys project from the ridge of the main block and a second interior brick chimney projects from the roof of the ell. The house has been altered with vinyl siding and replacement windows. The roof is metal and the foundation appears to be stuccoed or poured concrete, which probably replaced the original piers.

This resource is an altered circa-1880 I-house. Its integrity has been diminished by the installation of vinyl siding and windows and a new foundation. One historic outbuilding was recorded, a circa-1920 bank barn. The barn is not significant independent of the main dwelling. The property is not known to have associations with events or persons significant in the past. For these reasons, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**Wildwood Farm  
1868 Adney Gap Road, Callaway, Franklin County  
VDHR No. 033-5395**

Wildwood Farm is located on a 178.5-acre parcel on the south side of Adney Gap Road west of the intersection with Dillons Mill Road in the picturesque valley cut by the North Fork of the Blackwater River. The river crosses the cow pasture at the east end of the parcel. The house and a cluster of outbuildings sit approximately 1,000 feet south of Adney Gap Road where a modern metal entrance gate with a suspended “Wildwood” sign marks the entrance to the property. The house faces east toward Dillon Mill Road. Historic outbuildings include a frame spring house on piers on a stream north of the house, a shed-roof frame shed the west of the house, and a deteriorated gabled barn with a metal roof and vertical plank siding southwest of the house. Also southwest of the house are two modern outbuildings, a prefabricated metal garage, and mobile home with a gabled addition.

The property is centered on a circa-1910 Vernacular I-house which features a decorative cross-gable roof and a two-story rear ell. The ell has an enclosed porch on the north side, and a hipped roof full-width front porch spans the façade. Six square posts support the porch roof. The house has been altered with vinyl siding, a replacement front door, and replacement two-over-two vinyl windows. The roof is covered with metal and an interior chimney projects from the ell. The foundation appears to be built of replacement concrete blocks and the house sits on partial basement.

This resource is a Vernacular I-house. The vinyl siding, replacement vinyl windows and door and new foundation erode the house’s physical integrity and therefore it is not an intact example of an I-house dwelling. While the rural landscape is intact, the surviving historic outbuildings are not examples of any particular building type or construction technique and are not significant independent of the main dwelling. The buildings as a group do not strongly convey rural or agricultural life. The property is not known to have associations with events or persons significant in the past. Therefore, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**House**  
**7879 Grassy Hill Road (Route 919), Boones Mill, Franklin County**  
**VDHR No. 033-5398**

This resource is a circa-1870 house on a 1.5-acre parcel at the end of a gravel driveway on the west side of Grassy Hill Road (Figure 5; Photograph 3). A private bridge along the driveway spans Teels Creek. A small hip-roof shed is on the north side of the driveway. Northeast of the house are several outbuildings, including a cinderblock garage, a metal studio, and a frame shed. The yard exhibits mature boxwoods, trees, and landscaping. Surrounding the house are approximately 220 acres of agricultural fields.

This Vernacular I-house features a side-gable metal roof, brick exterior end chimneys, weatherboard siding, two-over-two sash windows, a single-story hipped roof porch supported by square wooden columns and a brick foundation. A two-story ell with enclosed porches, shed wings, and a modern deck extends from the rear elevation.

This resource consists of circa-1870 dwelling and a number of outbuildings that were not clearly visible from the public right-of-way. The house appears to retain a high degree of materials integrity. The resource's links with past events and people have not been investigated. Additional research and an intensive survey are recommended to make an NRHP eligibility determination for this property.

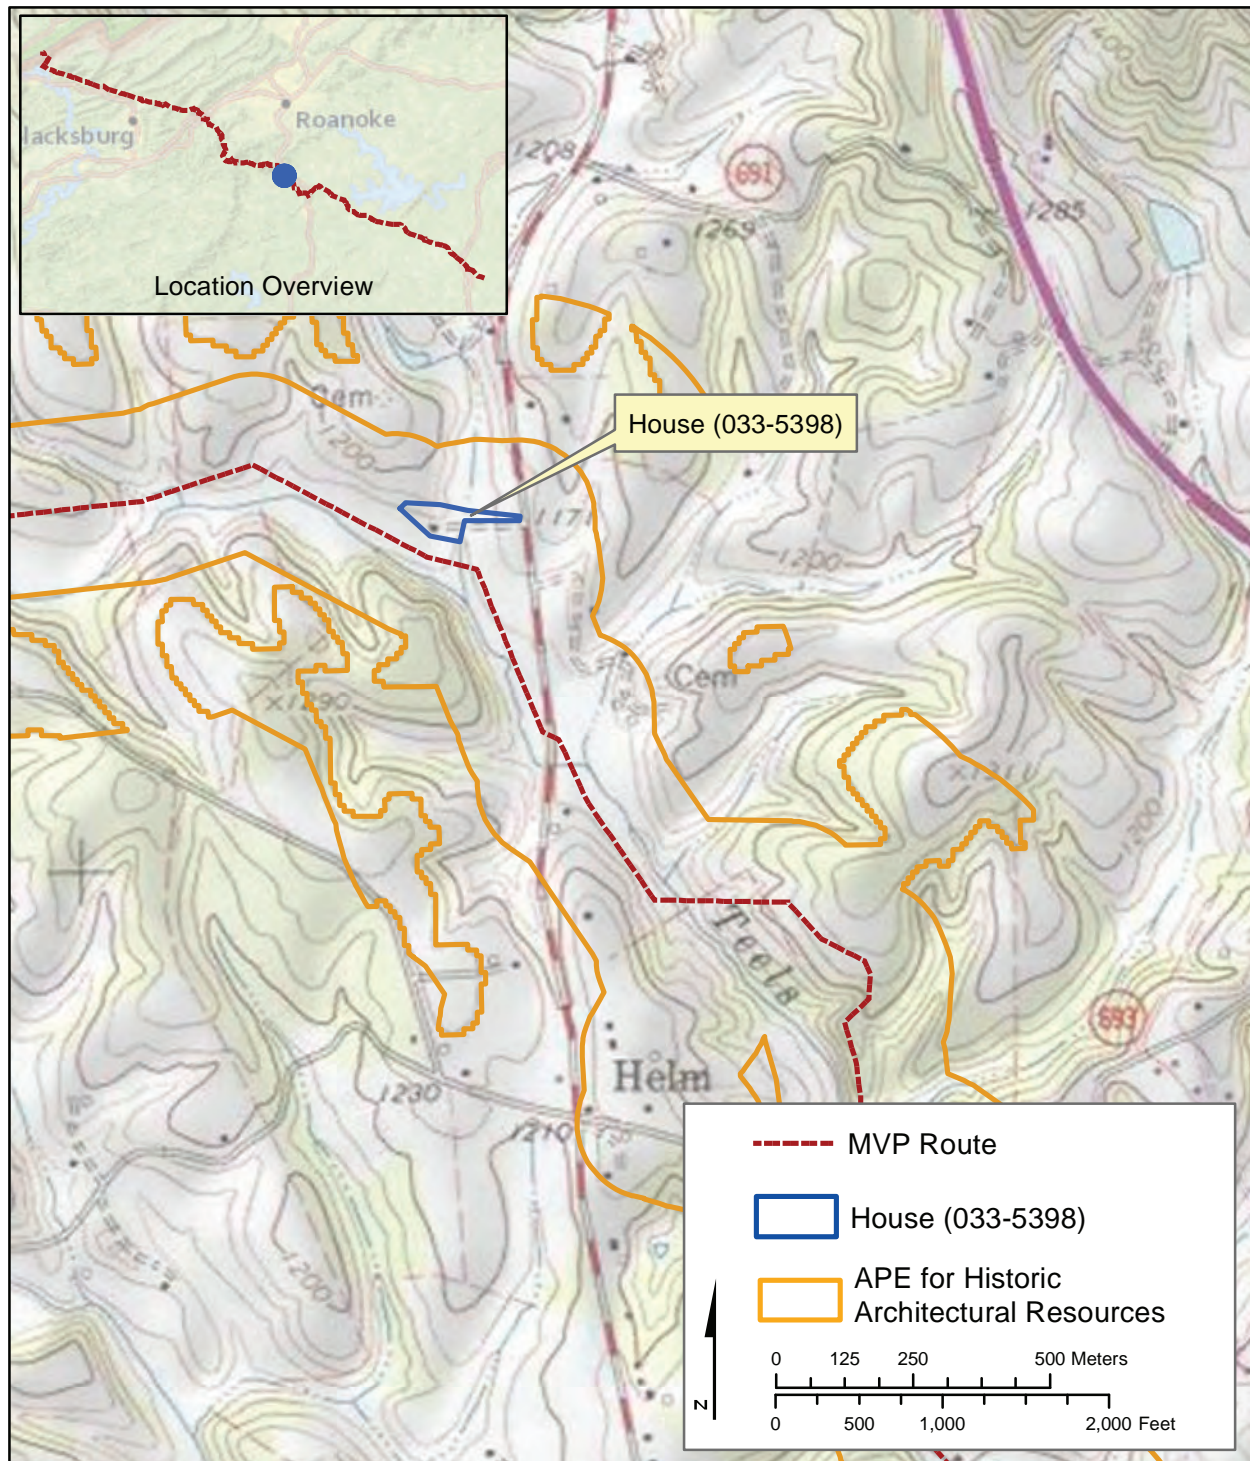

**House**  
**331 Monty Road (Route 828), Boones Mill, Franklin County**  
**VDHR No. 033-5399**

This circa-1932 dwelling is located on a level one-acre parcel on the east side of Monty Road. A gravel driveway on the south side of the house accesses the parcel. No outbuildings or significant landscape features were noted.

This circa-1932 rectangular Craftsman-style house has a hipped roof and a partially enclosed inset wrap-around porch. Vinyl siding covers the exterior walls and the original windows have been replaced with vinyl one-over-one sashes. The roof is covered with asphalt shingles and has two projecting interior brick flues. The house rests on a brick pier foundation. A carport wing projects from the rear (east side).

This resource is a typical example of an early twentieth-century Craftsman-styled farmhouse lacking distinctive architectural features and materials integrity. The property is not known to have associations with events or persons significant in the past. For these reasons, the property is recommended not eligible for the NRHP under Criteria A, B, or C.

**Figure 5. Map Showing Location of House (033-5398)**

Source: USGS 7.5 Minute Quadrangle Map, Boones Mill, VA (1979)

**Photograph 3. House (033-5398), View West**

**House**  
**1115 Leaning Oak (Route 728), Boones Mill, Franklin County**  
**VDHR No. 033-5400**

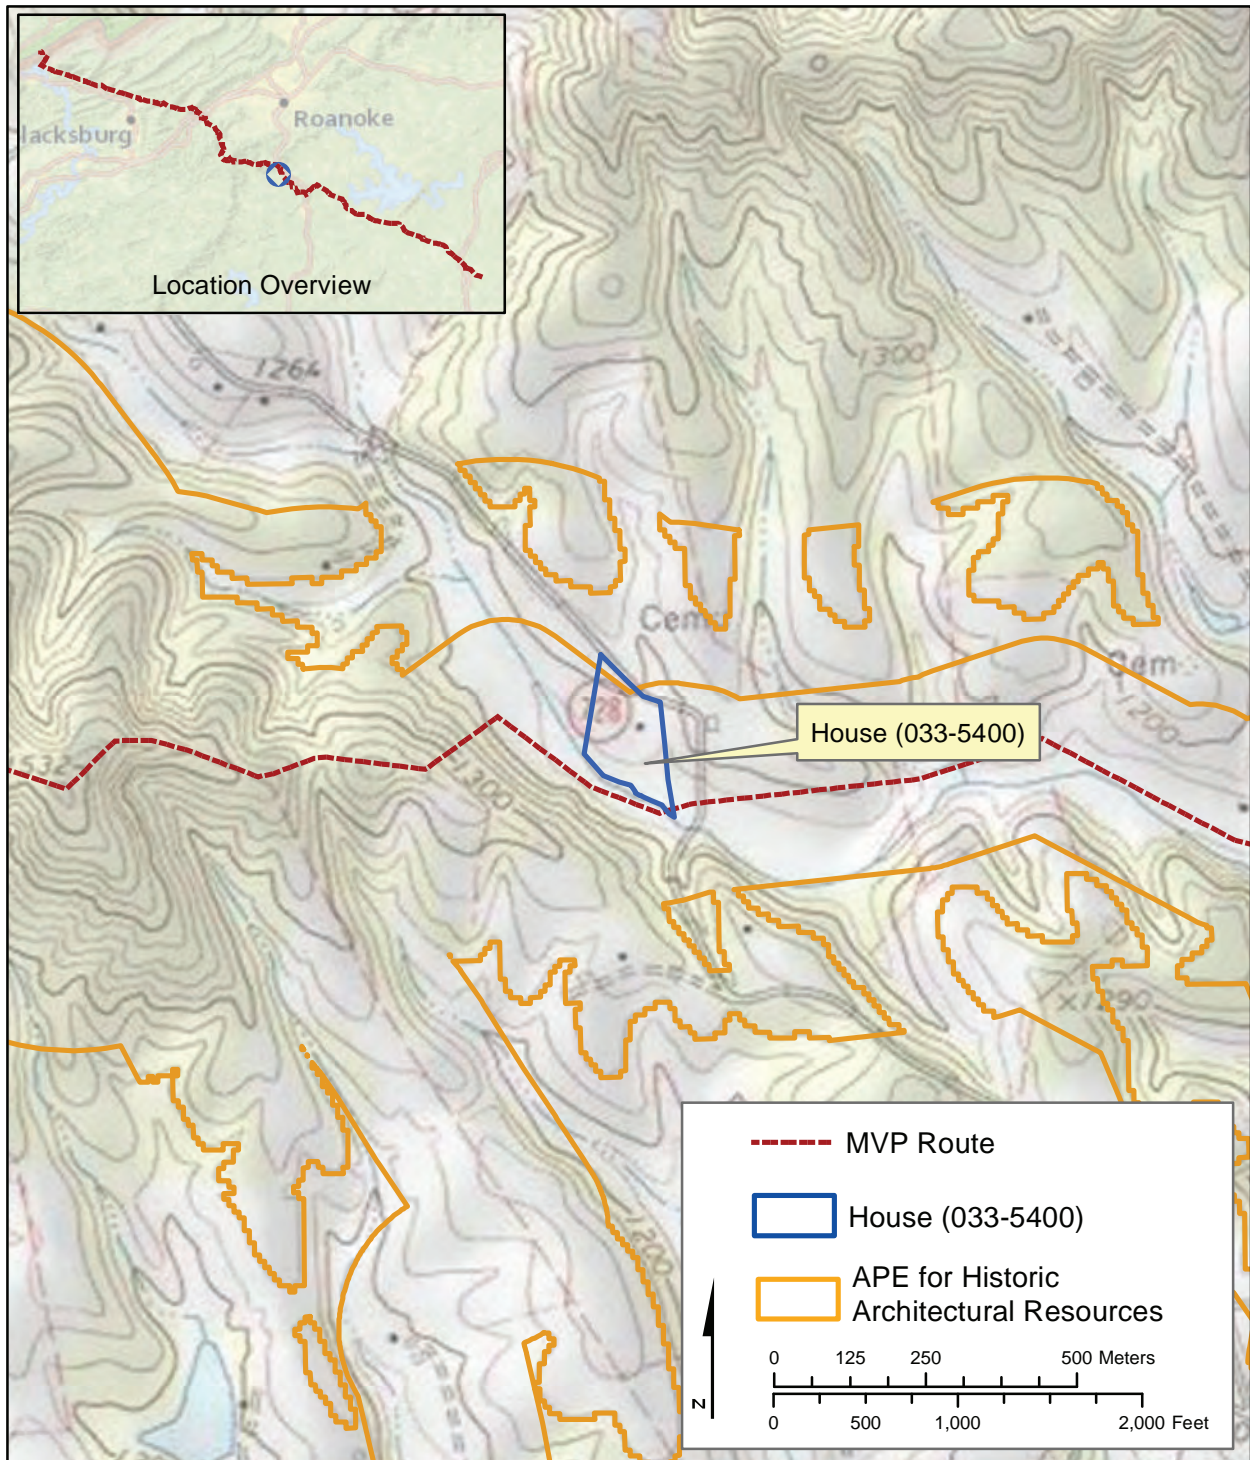

This circa-1850 farmhouse is located on a five-acre parcel on the south side of Leaning Oak Road and on the north side of Teels Creek (Figure 6; Photograph 4). In the south yard are several outbuildings, including a circa 1925 garage and a modern shop building. The front yard has mature deciduous trees and a boxwood allee in front of the house. Agricultural fields on all sides surround the parcel.

The two-story frame Greek Revival I-house features a side-gable roof with metal shingles, exterior end brick chimneys, original weatherboard siding, six-over-six sash windows, and a brick foundation. The partial-width single-story front porch has a hip roof and tapered square wood columns. The main entrance is flanked by sidelights; the second level center bay window is also flanked by sidelights and robust columnettes.

This house is a well-preserved example of an antebellum Greek Revival dwelling. It retains a high degree of integrity of materials, design, and construction as well as an intact rural setting. The resource is potentially eligible for the NRHP under Criterion C. Its historical association with important events or persons in the past is unknown. Additional research and an intensive survey are recommended to make an NRHP eligibility determination for this property.

## SECTION IV. SUMMARY AND RECOMMENDATIONS

In total, 28 newly surveyed historic resources and six previously recorded historic resources were recorded within the final Mountain Valley Pipeline architectural resources APE in Pittsylvania and Franklin counties during the second phase of fieldwork. Of the 34 resources recorded as part of the second phase of fieldwork in Pittsylvania and Franklin counties, New South recommends four (033-0389, 033-5398, 071-5483, and 033-5400) resources for Phase II study to determine NRHP eligibility. The remaining 30 resources are recommended not eligible for the NRHP (071-5157, 071-5465, 071-5515, 071-5516, 071-5517, 071-5518, 071-5519, 071-5520, 071-5521, 071-5522, 071-5524, 071-5506, 071-5507, 071-5508, 033-0388, 033-5183, 033-5376, 033-5377, 033-5378, 033-5380, 033-5382, 033-5383, 033-5384, 033-5386, 033-5388, 033-5389, 033-5390, 033-5391, 033-5395, and 033-5399) (Table 3).
